Gantry structure home elevator

Traction gantry type residential elevator : as two guidrails are respectively on both sides of elevator car, it is like two people carrying sedan , car gets even encountered force on both sides. Therefore it is more and more smooth for car operation. It helps to prolong service life of the elevator.

Backpack frame structure home elevator

Backpack frame structure home elevator mainly targets upon narrow and very deep well inside villa. Meanwhile, such structure home elevator is indispensable choice for 90° double-car-door elevator.

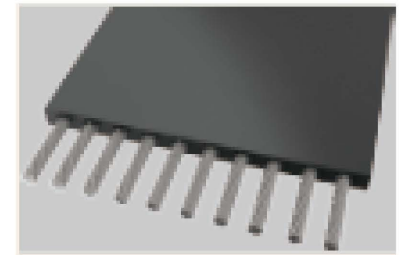

Steel belt home elevator

FUJI home elevator applies the more energy-saving,environment protection and durable composite wire cable.It matches with multiple leading international technologies such as effective energy-saving host,variable frequency door machine,safe and reliable light curtain door protection device etc.It brings vertical transport elevator development into a new stage.

Traditional wire rope

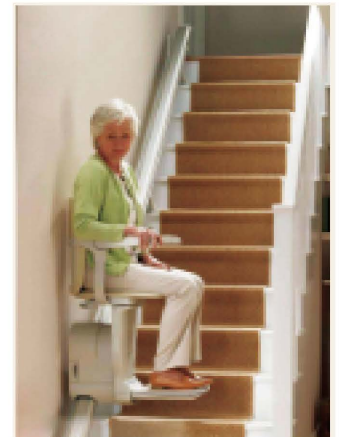

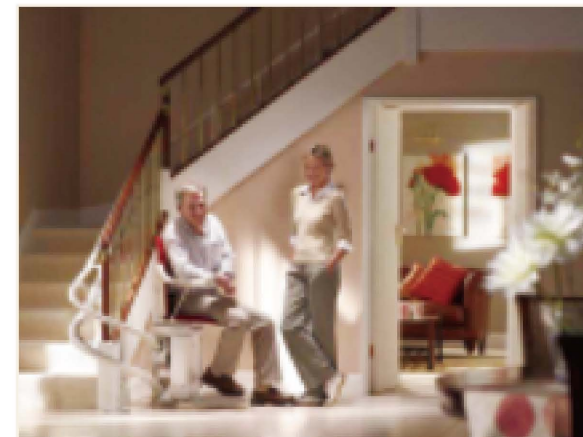

Composite steel belt

Compared with the traditional wire rope:

- 1.Polyurethane (PU) material layer without lubrication
- 2.Its life is two or three times higher than that of traditional wire rope
- 3.It is more bendable.It increases the contact area with drive wheel.It is more effective and energy-saving.

Seat style home elevator

Seat style home elevator runs at the side of stairs. It mainly helps the old and disabled to up / down the stairs at home.

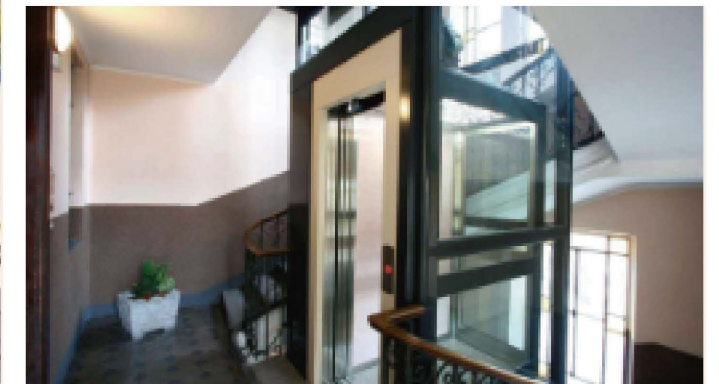

Hydraulic type home elevator

- ◎ It does not need machine room. It saves the building cost.
- ◎ It applies counter level style and gantry style elevator structure according to door opening requirements of the housing structure.
- ◎ VVVF drive technology: Home elevator dedicated micro-computer control is smooth and comfortable.
- ◎ Special traction machine base frame is fixed on guiderail. The building does not bear the load.
- ◎ Machine: It can apply 220V single-phase power supply of ordinary family use. It does not need to apply for industrial power supply.
- ◎ Automatic door operator: Variable frequency energy-saving safe and reliable.
- ◎ UPS (backup) can release the passengers during power failure.
- ◎ Disect dialing of external line: Under emergency conditions, you can call anybody you want.
- ◎ In the operation, total rated power is 1.5KW including 1.1KW for drive system. Its power is less than that of a micro-wave oven. It saves about 80% of electrical energy when comparing with a commercial use small elevator.

Forced drive home elevator

The forced drive elevator (including the drum drive) is a non frictional elevator driven by a chain or wire rope. There is no weight balance device, which has the advantage of saving the well space. Matching and decoration style, proper car decoration is also the perfect choice for household elevator.

Screw type home elevator

FUJI screw type home elevator breaks through the drive mode of traditional elevator. It applies the safer, more effective and concise structure screw purity technology. It brings about the more optimized product properties with the more concise structure. As it uses modular installation structure design, it greatly saves the installation time. It is more prompt and convenient in maintenance. It provides limited space of modern building with infinite design possibilities. It is your ideal home elevator for residential / villa purpose.
